Anti-finger printing agent T-1

1.Description

Anti-finger printing agent T - 1 is a kind of acrylic copolymer; moderate dosage of T-1 in metallic powder system can effectively reduce the friction between the molecules and surface tension of film , thus promoting the arrangement, improving metallic powder surface resistance and eliminate finger printing.

2.Typical physical data

Appearance	white powder
Melting process temperature(°C)	100-120
Solid content(%)	>99

3.Method and dosage

According to the formulation, 1-3% of the total for extrusion.

4. package and storage:

Packaging with PE lined Kraft paper bags, Net weight 25kg per bag. Store in cool and dry place to avoid moisture. According to our experience, the shelf life of this product is at least 2 years when ambient temperature below 30 °C.
