Antistatic agent T-30(TDS)

1. Description

T - 30 is white carbon adsorption of charged groups ammonium salt. It can effectively enhance powder **particles chargability ,thereby improve powder adsorption rate.** when spraying powder is in process so it overcomes the leakage of electrostatic shielding effect;it can still make powder product, preventing agglomeration.

2. Typical physical data

Appearance	white powder
effective content	$\geq 60\%$
the free flow of volatile experiment	$\leq 1.5\%$
Volatiles(%)	≤ 1

3. Suggested formulation

According to 0.1-0.3% in total formula for extrusion.

4. Packaging and storage

Polyethylene lining, net weight 25KG caveat; stored in a cool and dry place to avoid moisture absorption.
