Resin base defoamer T-962 (TDS)

1. Description

T-962 is a modified resin base copolymer degassing agent. It can provide smoke-free, anti-yellowing, transparent properties. It's mainly design for low temp cure or transparent powder coating and substitute the benzoin thus avoid Residue accumulation due to the Recrystallization.

2. Typical physical data

Appearance	White fine power
Active component	≥99%
Soft point (°C)	110-120°C

3. Application

Co-extrude by incorporating 0.3-0.5%
